7. DATASET OVERVIEW

7.1 Abstract

Future Ocean Regional Projection (FORP) datasets were produced by high-resolution regional ocean model simulations with ensemble atmospheric forcings from Coupled Model Intercomparison Project Phase 5 (CMIP5) models and scenarios. These were developed by the Japan Agency for Marine-Earth Science and Technology (JAMSTEC) under Social Implementation Program on Climate Change Adaptation Technology (SI-CAT, grant no.: JPMXD0715667163) supported by the Ministry of Education, Culture, Sports, Science and Technology (MEXT). Meteorological Research Institute Community Ocean Model version 4 (MRI.COMv4; Tsujino et al. 2017) was used for the regional ocean models.

FORP-JPN02 is a historical and future ocean projection dataset in the region surrounding Japan with an approximately 2 km horizontal resolution, produced by dynamical downscaling simulation for several time slices from FORP-NP10 data. FORP-JPN02 version1 was from the dynamical downscaling of FORP-NP10 version1. The time slices of the FORP-JPN02 version1 are

1996-2005 from the historical run of MIROC5,

1996-2005 from the historical run of MRI-CGCM3,

2086-2100 from the RCP2.6 run of MRI-CGCM3,

2006-2015, 2016-2025, 2026-2035, 2036-2045, 2046-2055, 2086-2100 from the RCP8.5 run of MRI-CGCM3, and

1996-2005, 2006-2015 from the JRA-55 historical simulation.

The method of the dynamical downscaling was a simple one-way nesting method.

The dataset includes the following variables (daily mean) in netCDF:

potential temperature (t), salinity (s), sea surface height (ssh), eastward velocity (u), northward velocity (v), surface heat and fresh water fluxes (flx), atmospheric elements for the surface forcing in the ocean model grid (atm, wind)

Please the header information of each netCDF file for the details of the variables.

7.2 Topic Category(ISO19139)

climatologyMeteorologyAtmosphere

oceans

environment

7.3 Temporal Extent

Begin Date	1996-01-01
End Date	2100-12-31
Temporal Characteristics	Daily

7.4 Geographic Bounding Box

North bound latitude	47.5
West bound longitude	150

Eastbound longitude	122.6
South bound latitude	23.7

7.5 Grid

Dimension Name	Dimension Size (slice number of the dimension)	Resolution Unit
row	826	1/30 (deg)
column	1194	1/50 (deg)
vertical	54	1, 1.75, 2.75, ..., 600 (m)

7.6 Geographic Description

7.7 Keywords

7.7.1 Keywords on Dataset

Keyword Type	Keyword	Keyword thesaurus Name
theme	Oceans > Ocean Temperature, Oceans > Ocean Circulation > Ocean Currents, Oceans > Coastal Processes	GCMD_science
theme	Models > GCM	GCMD_platform
theme	Climate	GEOSS

7.7.2 Keywords on Project

7.7.2.1 Data Integration and Analysis System

Keyword Type	Keyword	Keyword thesaurus Name

9. DATA REMARKS

10. DATA POLICY

10.1 Data Policy by the Data Provider

1. The dataset is available for free for scientific and educational purposes. If you wish to use the dataset for non-scientific or non-educational purposes, please inform us in advance and follow our instructions.

2. The source of the dataset should be accordingly acknowledged, and the article below should also be referred in scientific or technical papers, publications, press releases or other communications regarding the dataset.

Nishikawa et al. 2021, Development of high-resolution future ocean regional projection datasets for coastal applications in Japan. Progress in Earth and Planetary Science, 8:7, https://doi.org/10.1186/s40645-020-00399-z

3. Users should provide JAMSTEC/IEP a copy or URI of their scientific or technical papers, publications, press releases or other communications regarding the dataset.

4. Users are not permitted to redistribute, deliver, or sell the dataset to public.

[Constraints and Disclaimer]

1. The copyright and intellectual property right of the dataset belong to JAMSTEC. Please note that although JAMSTEC has paid the close attention to produce the dataset, JAMSTEC assumes no responsibility regarding the reliability of the dataset.

2. JAMSTEC is not responsible to users for any damage that may be caused by the use of the dataset.

10.2 Data Policy by the Project

10.2.1 Data Integration and Analysis System

If data provider does not have data policy, DIAS Terms of Service (https://diasjp.net/en/terms/) and DIAS Privacy Policy (https://diasjp.net/en/privacy/) apply.

If there is a conflict between DIAS Terms of Service and data provider's policy, the data provider's policy shall prevail.

11. LICENSE

12. DATA SOURCE ACKNOWLEDGEMENT

12.1 Acknowledge the Data Provider

This study utilized the dataset 'Future Ocean Regional Projection' (FORP), which was produced by the Japan Agency for Marine-Science and Technology (JAMSTEC) under the 'SI-CAT' project (Grant Number: JPMXD0715667163) of the Ministry of Education, Culture, Sports, Science and Technology, Japan.

12.2 Acknowledge the Project

12.2.1 Data Integration and Analysis System

If you plan to use this dataset for a conference presentation, paper, journal article, or report etc., please include acknowledgments referred to following examples. If the data provider describes examples of acknowledgments, include them as well.

" In this study, [Name of Dataset] provided by [Name of Data Provider] was utilized. This dataset was also collected and provided under the Data Integration and Analysis System (DIAS), which was developed and operated by a project supported by the Ministry of Education, Culture, Sports, Science and Technology. "
