## 7. DATASET OVERVIEW

### 7.1 Abstract

This dataset contains the results of the HighResMIP experiments produced by the Meteorological Research Institute Atmospheric General Circulation Model version 3.2H (MRI-AGCM3.2H) for the Coupled Model Intercomparison Project Phase 6 (CMIP6).

This work has been carried out in the ordinary research activity of the Meteorological Research Institute: "Research on Climate and Environmental Change with Advanced Climate Modeling" (FY2014-2018), "Research on Atmosphere, Ocean, and Earth System Modeling" and "Research on Attribution and Projection of Climatic/Global Environmental Change" (FY2019-2023). A part of the CMIP6 experiments (HighResMIP) was supported by the Integrated Research Program for Advancing Climate Models (TOUGOU) Grant Number JPMXD0717935561 from the Ministry of Education, Culture, Sports, Science and Technology (MEXT), Japan.

The release of this dataset was supported by the Data Integration and Analysis System (DIAS) of MEXT.

All CMIP6 data are collected, managed and published by the Earth System Grid Federation (ESGF), and DIAS serves as one node of the ESGF. All public datasets, including this dataset, are available from ESGF. Please refer to the CMIP6 Guidance for Data Users (see online info below) for information on the use of these datasets, including this dataset.
