7. DATASET OVERVIEW

7.1 Abstract

The NAR02017 regional climate change scenario has agro-meteorological elements such as solar radiation, relative humidity, and surface wind speed, which are few examples in common climate scenarios across fields so far.

The variance of climate model output with small daily and annual fluctuations is matched by observational statistics. It is a climate scenario that can certainly apply with climate extremes.

Attention!!: In principle, this data set is not available for the previous version. If you have provided the same data from different sources in the past and need to recalculate for confirmation, you will only be allowed to use it for 30 days.

7.9 Data Environmental Information

Please use the other version2_7r dataset for climate impact assessment hereafter. This Version2_2 with the same name is an older version developed in 2017 and it tends to further overestimate higher temperatures.

7.10 Distribution Information

8. DATA PROCESSING

8.1 Data Processing (1)

8.1.1 General Explanation of the data producer's knowledge about the lineage of a dataset

The variance of climate model output, which fluctuates daily and year by year, is in line with the observation statistics.

8.1.2 Data Source

Data Source Citation Name	Description of derived parameters and processing techniques used
CMIP5	IPCC_WGI-AR5

9. DATA REMARKS

10. DATA POLICY

10.1 Data Policy by the Data Provider

This data is an older version. It will not be available in the future.

10.2 Data Policy by the Project

10.2.1 Data Integration and Analysis System

If data provider does not have data policy, DIAS Terms of Service (<https://diasjp.net/en/terms/>) and DIAS Privacy Policy (<https://diasjp.net/en/privacy/>) apply.

If there is a conflict between DIAS Terms of Service and data provider's policy, the data provider's policy shall prevail.

11. LICENSE

12. DATA SOURCE ACKNOWLEDGEMENT

12.1 Acknowledge the Data Provider

12.2 Acknowledge the Project

12.2.1 Data Integration and Analysis System

If you plan to use this dataset for a conference presentation, paper, journal article, or report etc., please include acknowledgments referred to following examples. If the data provider describes examples of acknowledgments, include them as well.

” In this study, [Name of Dataset] provided by [Name of Data Provider] was utilized. This dataset was also collected and provided under the Data Integration and Analysis System (DIAS), which was developed and operated by a project supported by the Ministry of Education, Culture, Sports, Science and Technology. ”
